The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

LF Montanaro UK Income Fund , GBP A Accumulation Shares, a fund within LF Montanaro Funds (ISIN: GB00BJRCFW88)

The fund is managed by Link Fund Solutions Limited.

Objective and investment policy

Objective

To achieve growth in income (money available to be paid out by the fund) and capital (an increase in the value of the fund) after all costs and charges have been taken, over any five year period.

There is no guarantee that the objective will be met over any time period and you may get back less than you invest.

Investment Policy

To invest at least 60% of the fund in the shares of small and medium sized UK companies, including REITs (Real Estate Investment Trusts are companies that aim to generate an income and/or profit from investing in property), that have a maximum market capitalisation (the total value of the company) of £10 billion.

The fund may also invest up to 40% in larger UK companies, including REITs, money market instruments (which are short term loans that pay interest) and cash. The fund may also invest up to 20% in small, medium and large sized companies, including REITs in the European Union (excluding for this purpose the United Kingdom), Iceland, Norway and Switzerland.

The Investment Manager will invest in shares of companies in accordance with their Ethical, Environmental, Social and Governance (ESG) Policy. This policy prevents, for example, investment in any shares that have more than 10% in revenue from the following: weapons, tobacco, gambling, pornography and alcohol. (The full ESG policy is available at www.linkfundsolutions.co.uk).

In addition, the Investment Manager buys companies that in their opinion are of high quality, well-managed, with sound balance sheets and operate in markets that offer the potential to grow faster than the economy as a whole.

Other features of the fund:

- The fund is actively managed. The Investment Manager uses its expertise to select investments for the fund and has the discretion to invest without the need to adhere to a particular benchmark.
- The fund can invest across different industry sectors without limitation.
- You can buy and sell shares in the fund on each business day.
- Income from the fund will be added to the value of your investment.
- Derivatives (whose value is linked to that of another investment, e.g company shares, currencies) may be used to manage the risk profile of the fund.
- Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

- This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. As the fund has less than 5 years price history, this calculation incorporates the volatility of an appropriate benchmark index. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains.
- The fund has been classed as 6 because its volatility has been measured as above average to high.
- This indicator is based on a mixture of the fund's historical data and simulated historical data and may not be a reliable indication of the future risk profile of this fund.
- The risk and reward profile shown is not guaranteed to remain the same and may shift over time. Number 1 on the scale does not mean that a fund is risk free.

- Counterparty Risk: The failure of a firm involved in a transaction with the fund or providing services to the fund may expose the fund to financial loss.
- Derivative Risk: A derivative may not perform as expected and may create losses greater than its cost.
- Liquidity Risk: Smaller companies' securities are often traded less frequently than those of larger companies which means they may be more difficult to buy and sell. Their prices may also be subject to short term swings (both up and down) in their value.
- Currency Risk: As the fund can be exposed to different currencies, changes in exchange rates may decrease the value of your investment.
- Ethical and ESG Investments Risk: The fund is prevented from investing in certain sectors or companies. This narrower range may constrain the fund's performance. If an investment no longer meets the ethical exclusion criteria it will be sold and the price obtained may be less than could be obtained if a forced sale was not required.
- For full details of the fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' below.
