## Risk & Reward Profile

These numbers rate how the Fund may perform and the risk of losing some or all of your investment. In general the potential for higher returns also implies a higher level of risk. However, the lowest category (1) does not mean a risk free investment.

This risk rating is based on historical data which may not be a reliable indication of the future risks and rewards of the fund. The risk rating of the fund may change over time.

Past performance is not a reliable indicator of future results. All investments are subject to risk and the value of shares and the income from them can fall as well as rise due to stock market and currency movements. You may not get back as much as you originally invested.

For further information please see the Risk and Reward section of the Key Investor Information Document (KID).
